

Precision in production

tool making, precision parts, overhauling, tungsten carbide components and more

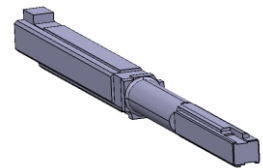

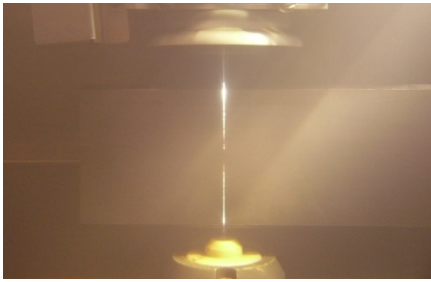

Hardmetal Bt. was founded in 1991 as a family enterprise. With a strong tool making basis the company has become specialist in the cutting of tungsten carbide.

We do the following typical products mainly from tungsten carbide, and PM tool steels.:

- wear parts
- punches , dies, shear blades
- stamping parts
- precision components
- presstools
- powder pressing tools
- forging tool inserts
- blades for centerless grinding
- drill bushes,
- deep drawing rings
- cutting inserts
- PCD inserted parts
- plastic injection moulding working parts etc.

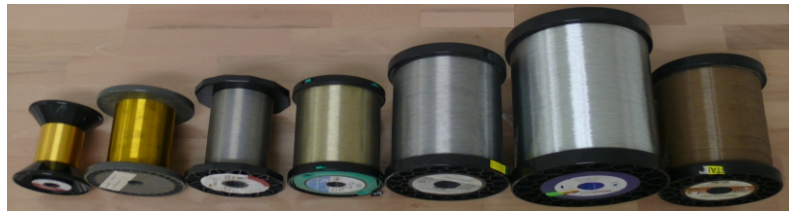

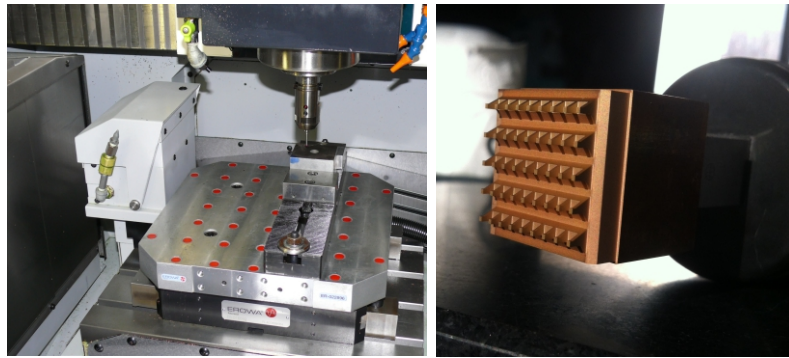

During our processes we assure the quality according to the EN ISO 9001/2008 standards .

Our mission is to use the available technologies on the market with expertise and precision with the shortest possible deadlines for the satisfaction of our clients .

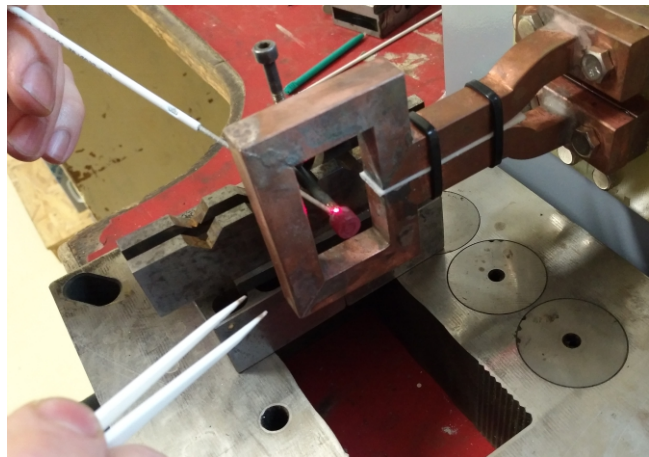

For the wire EDM technology we use \varnothing 0.03mm-0.3mm wires

In our job we try to fulfill the requirements by combining the old type hand and machining methods - like lapping, optical grinding, gas soldering - with the latest machining technologies /EDM, HSC milling, inductional soldering../.

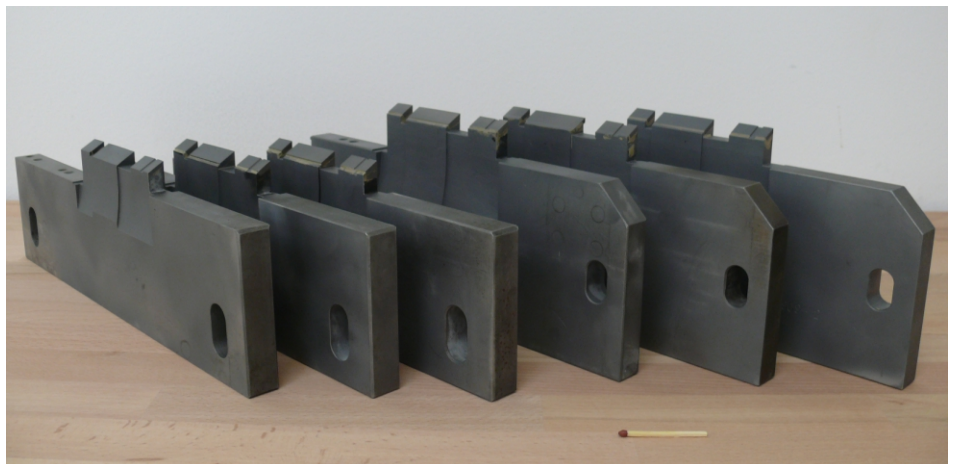

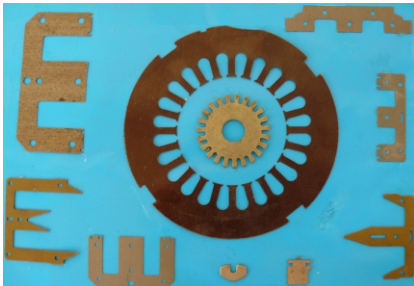

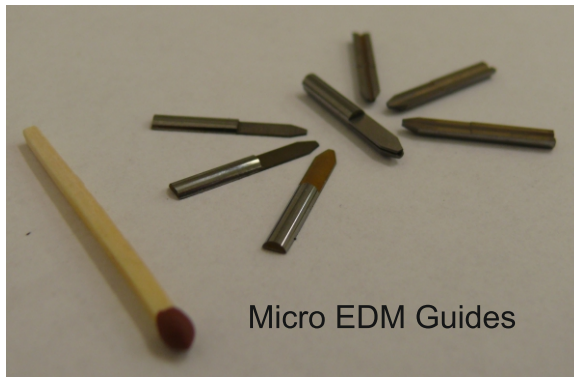

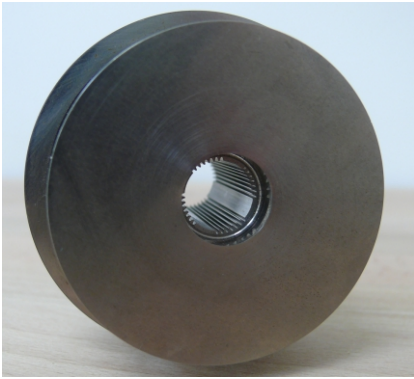

We are a supplier to the following industries:

- automotive
- electrical
- pharmaceutical
- medical
- optical
- banknote printing, bankcard, foil cutting
- plastic
- etc.
